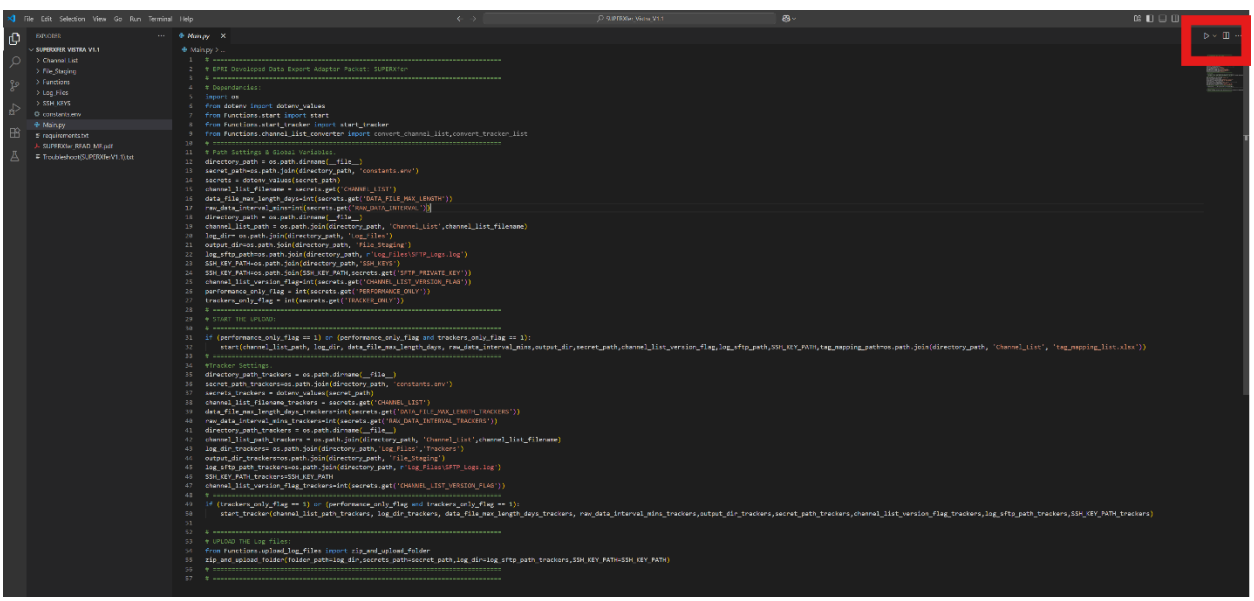
1. Go to SUPERXfer folder and this is how it should look:

   a. Click on the path, and write “cmd”

   b. Then in the command prompt write **code .** (code<*space*>dot)

2. This will open the VS code window.

   a. After opening the VS code window, open the “main.py”

   b. Click the play button to run the script. (Top right as shown in image below)


3. This is how it looks:
